Right Care, Right Place

Make your voice heard on the future of intermediate care. Visit dghscp.co.uk/rightcarerightplace to learn more and complete the survey.

Intermediate Care describes what help people are accessing between an acute hospital setting and what they are able to manage independently at home.

It can be about helping people remain at home when they're becoming more dependent on care, or helping them to recover from illness, a fall or an operation. It can be about preventing people from going into hospital unnecessarily, or returning home more quickly after a hospital stay.
